What's New In?

FPI Scriptor is a standalone application that helps you write and compile FPI Scripts with less stress than ever before. There are no dependencies except another FPI Scriptor on your system. It comes with powerful built-in tools to manage your scripts efficiently and easy syntax highlighting, code completion, navigate to definition, and quick search. 2. Script editor: FPI Scriptor helps you write FPI Scripts by helping you with FPI Scripting. You can paste your script to the script editor area to test it or you can write your script directly in the script editor area. 3. Picking up coding with tabs: You can easily browse over 200 pre-written scripts with tabs and directly edit each component of them easily. 4. Script checking: FPI Scriptor instantly checks the syntax and coding of your FPI Script, and will inform you if there is something wrong with it. 5. Debugging: FPI Scriptor is designed to help you debug your FPI Script. You can find the result of your FPI Script in the result display area. To debug your code, you can use FPI Scriptor to call your FPI Script directly in the result display area. 6. Compilation: FPI Scriptor helps you compile your FPI Script in the compile dialog. 7. Saving: FPI Scriptor can save and copy your scripts to anywhere you wish it to be saved. You can also compile multiple FPI Scripts by pressing CTRL + A. In this way, you can easily compile multiple FPI Scripts without changing anything. 8. Version control: FPI Scriptor is not only a standalone application. It is also a version control system. Thus, you can always remember your compiled scripts if you do anything wrong, or want to retrieve them in the future. 9. Useful features: FPI Scriptor supports all standard scripting formats. When you select a file, it will process the script directly. FPI Scriptor supports to save your files on your hard disk. There are many useful features that you can use, including but not limited to: • Syntax check for script • Syntax color for script • Syntax completion for script • Syntax highlighting for script • Cross referencing for script • Navigation between variable, function, class and signature • Navigating to declaration • Remote compiling
