A new interface, the Ribbon, provides a clean, easy-to-use design, and the AutoCAD Desktop icon bar has been replaced with an AutoCAD logo. AutoCAD 2010 adds the new datum and filter tools. The ribbon now contains the tools for choosing surfaces, angles, dimensions and other objects that allow the user to design with greater efficiency. AutoCAD 2010 also adds the new Cloud architecture, which allows online access to information about the drawing. Changes for 2011 include the ability to tag elements in a drawing, the introduction of the new blocks feature and the capacity for designing in 3D. AutoCAD has a number of new features in the Autodesk Design Suite: ModelIO, which allows for 3D rendering of all of the objects in a drawing; Actionable Intelligence, which enables users to browse, tag and organize layers; and the Spatial Join function that allows a user to identify features of a drawing and combine the separate parts into a whole. AutoCAD 2010 also offers its own cloud architecture, a new drawing collaboration feature and more than 60 new commands and tools. Support for AutoCAD as a cloud application was introduced in AutoCAD 2011; users can now access the drawing from any location on any device.
